SUBIN PP

MERN STACK DEVELOPER

Passionate and driven graduate with expertise in HTML, CSS, JavaScript and React. Excited to apply my technical skills to dynamic, real-world projects and collaborate with innovative teams. Eager to learn, grow, and contribute to cutting-edge solutions that make an impact.

PROFESSIONAL EXPERIENCE

MERN STACK INTERN, LUMINAR TECHNOLAB

AUG 2024 - Present

- Developed and maintained web applications using MongoDB, Express.js, React, and Node.js..
- Implemented front-end components and APIs to enhance user experience and functionality.
- Collaborated with teams to debug issues and optimize application performance.

EDUCATION

BACHELOR OF COMPUTER APPLICATION (BCA)

University of Calicut
JUN 2021 - MAR 2024
CGPA - 6.89

PROJECTS

QuickFix – Fast and reliable service booking app (in development).

QuickFix is a service booking app built with React, Node.js, Express, and MongoDB. It features three roles: Admin, User, and Worker. Admins manage profiles, users can search and book available workers (e.g., plumbers, electricians) who are online, and workers can toggle their availability and accept bookings. The app focuses on smooth communication and efficient service booking.

Team Track - Employee Management

TeamTrack is a React-based employee management system that uses JSON Server as a backend to store and manage employee data. It supports CRUD operations (Create, Read, Update, Delete), allowing users to efficiently add, update, view, and delete employee records.
